ANOTHER *USEABLE* ACHIEVEMENT BY CASTLE

NOW ultrasonic cleaners

economically practical for your hospital

Now, low-cost Castle Ultrasonics can save your hospital thousands of dollars each year!

Through the magic of silent sound, you can clean instruments, glassware, and small utensils far better and faster than ever before.

Soils in crevices untouched by the most conscientious hand-scrubber are bombarded and blasted off. Even stained instruments sparkle like new after repeated Castle ultrasonic cleaning.

Most important—the simple, automatic Castle ultrasonic cycle incorporates an automatic ultrasonic drain-rinse phase which assures elimination of all soils . . . guarantees more positive cleaning than ever before possible.

SOILED INSTRUMENTS direct from surgery are here loaded into ultrasonic basket. Simplicity of cycle encourages immediate processing. Basket holds 75 to 100 instruments, including longest OB forceps.

CASTLE ULTRASONIC CYCLE is so simple and automatic that anyone can run it. One turn of the timer and unit automatically fills, washes, drains, and rinses, then shuts off, ready for next load. No watching, no timing.

TREMENDOUS CAVITATIONAL FORCE here explodes a film of oil from the surface of an immersed instrument. Despite speed and power of process, ultrasonics is gentle . . . won't harm glass, stainless steel, or etched markings.

CASTLE CLEANERS incorporate the all-important drain-rinse cycle. Ultrasonic power is on during this phase. Dislodged soils are automatically flushed from tank while load is hot water sprayed.
